

BEYOND HORIZONS

WELCOME TO OUR WORLD.

OUR VISION IS TO FULFILL
THE HUMAN DESIRE FOR
MOBILITY IN NEW, MORE
EFFICIENT AND
SUSTAINABLE WAYS

THAT'S WHAT WE ARE WORKING FOR.

We are a global technology leader when it comes to designing, developing and manufacturing lightweight systems for the aerospace industry. As a technology partner of all major aircraft and engine manufacturers, we are collaborating closely with our customers in order to devise solutions for the mobility of the future. All over the world, an aircraft with FACC technology on board takes off every second.

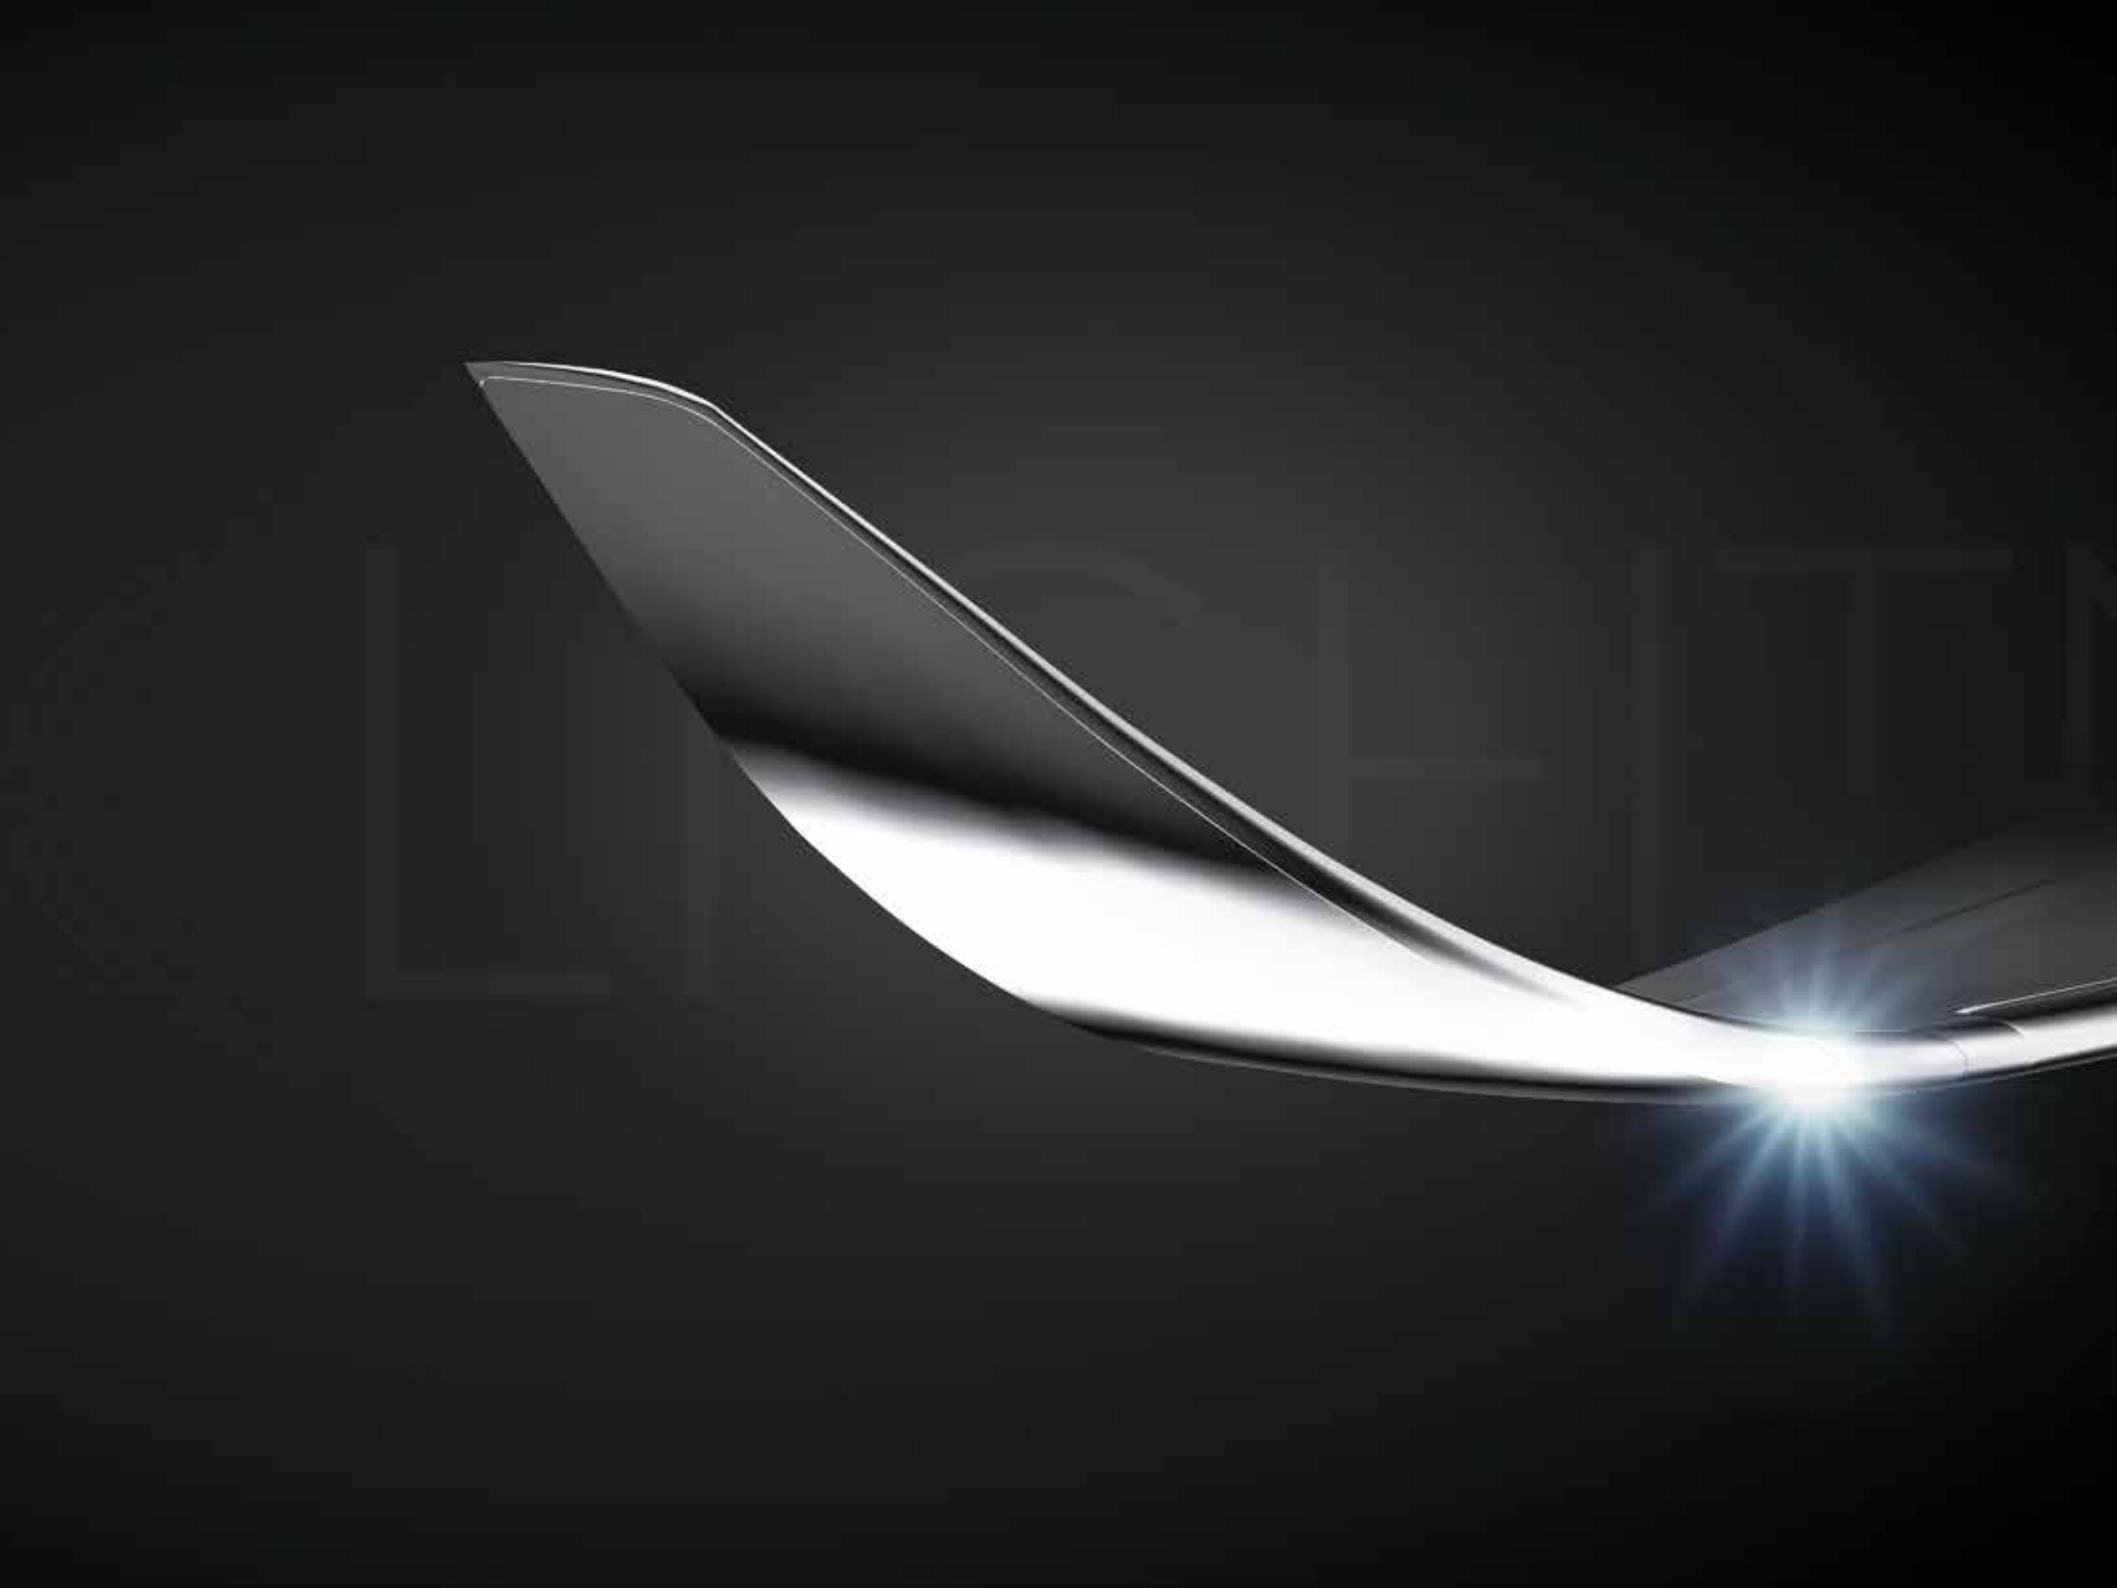

A hand holding a golden globe against a blue sky with clouds and an airplane. The hand is on the left, holding a golden globe. The sky is blue with white clouds. An airplane is flying in the sky on the right. The sun is shining from the left, creating a lens flare effect.

WE ARE WHERE
OUR CUSTOMERS
ARE

With more than 3,400 highly qualified employees from 38 nations working on sites around the globe, we are ready to assist and support our customers day by day.

We are a globally successful company with branches and subsidiaries in 13 countries, from Austria to China and from India to the United States and Canada. Our worldwide powerful presence in the key emerging markets of the industry ensures the commercial competitiveness of our customers and helps them conquer new markets and business segments.

THE FUTURE IS BUILT ON LIGHTFITNESS
WE SUPPLY IT

AEROSTRUCTURES

Innovative, light and resilient

Lightweight components for wings, tail assemblies and fuselages have been our core competency for more than 30 years. We are your ideal partner when it comes to developing, qualifying, certifying and manufacturing both primary and secondary aircraft structures. Acting as a system integrator, we supply ready-to-install turnkey solutions of superior quality. Perfection through passion is driving us.

A futuristic, glowing white mechanical structure, possibly a turbine or engine component, is shown in a dark, almost black environment. The structure is illuminated from the right, creating a bright, ethereal glow. The lighting highlights the intricate details and curves of the machinery. In the background, there are faint, large, stylized characters that appear to be 'EFFICI' repeated, suggesting a theme of efficiency or performance.

THE FUTURE DEMANDS

EFFICI

ENERGY WE REALIZE IT

NOICYY

ENGINES & NACELLES

Quieter, lighter & more efficient

Our engine products have been designed for high-end performance and extreme stress. The result of our efforts are components setting new standards with regard to noise emission, weight reduction and efficiency in cold air stream conditions as well as fairings thanks to special manufacturing technologies. Using state-of-the-art design and high-tech materials, we not only improve aerodynamic properties, but also reduce engine noise by 60% – an advantage in convenience for passengers in the aircraft itself, as well as for the environment around the airport.

WE MAKE FLYING GREENER

FACC technologies are also environmental winners. They help save weight and therefore fuel while optimizing flight characteristics, thus expanding the total range of aircraft.

Our exciting journey continues. We are working on sustainable solutions for the future even as we speak. Lighter, more efficient, enhanced comfort or less maintenance costs are only the beginning. In this way, we are contributing to making the world a better place on a daily basis.

THE FUTURE IS IN

DESIGN

GNI WE CREATE IT

CABIN INTERIORS

Comfortable, functional & esthetic

Thanks to our know-how and passion for design, FACC is your perfect partner for entire aircraft interiors. From overhead compartments to washrooms, from space optimization to the integration of exciting multimedia entertainment, from the pleasant feel of surfaces to appealing visual effects. Efficient and functional for OEM and airliners or customized and sophisticated for private business jets. We offer all-in-one solutions from a single source and strive to make sure that passengers will feel just as comfortable in the air as they feel at home.

THE FUTURE REQUIRES

PERFORMANCE

WE GUARANTEE IT

A man wearing a white protective suit and gloves is walking across a large, polished floor in an aircraft hangar. The hangar has large, multi-paned windows in the background. The nose of an aircraft is visible on the right side of the frame.

AFTERMARKET SERVICES

Repair, refurbish & replace

We are a genuine one-stop shop. Aided by our expertise as an OEM and our high-performance infrastructure in America, Asia and Europe, we also ensure that aircraft are back in the air faster and more cost-efficiently. We offer all the classic maintenance and repair services and are qualified to carry out design services for repairs and modifications.

WE ARE A TECHNOLOGY
PARTNER OF THE GLOBAL
AEROSPACE INDUSTRY
AND OUR CUSTOMERS
ARE THE WORLD'S
LEADING COMPANIES

THAT'S AN ACHIEVEMENT WE ARE PROUD OF.

THE FUTURE IS COMING FAST
WE ACCELERATE IT

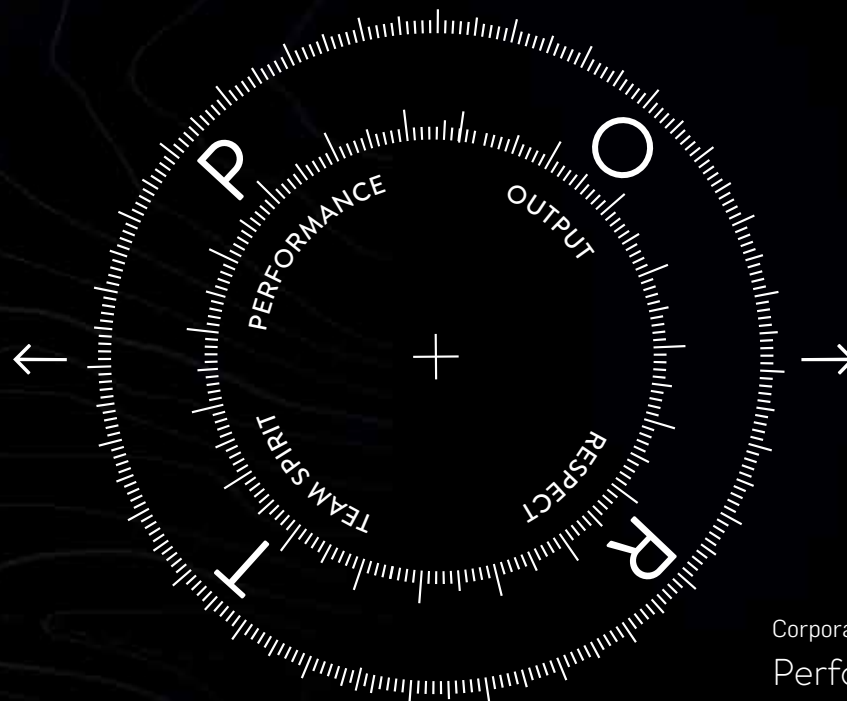

The mobility of the future will be founded on new technologies and the materials of tomorrow. In close coordination with our customers and experts around the world we are working towards this goal. New solutions require new approaches, and a reliable partner is vital in such endeavors. Because one thing is certain: the world keeps evolving, and so are we.

For us, our achievements are simply the springboard for new ideas. We think beyond existing horizons, from R&D and the use of new materials to more cost-efficient manufacturing technologies. Always open to groundbreaking approaches and exploring new ways in the field of aerospace, we at FACC are always one step ahead. The innovations we create today become the standards of tomorrow.

OUR VALUE AIR-
P.O.R.T.
PROVIDES ORIENTATION

We are guided by both human and corporate values.
We want to be the best partner for our customers and
the most attractive employer for our staff.

Human:
Respect and team spirit

We appreciate and respect our customers and fellow employees as much as we value our work ethics, this is the strength of our foundation. The FACC team spirit is built on this and is a special characterizing mark of our entire organization. With these qualities in mind, we are continually evolving together. Working for FACC means working in an exciting future-oriented industry ensuring a genuine sense of purpose and opening up new vistas.

Corporate:
Performance and output

Our customers must be able to rely on our products and services one hundred percent. Consequently, we believe in performance and output. We are committed to performance and success – there can be no success without high performance. And success is what a company thrives on. We are driven by our passion for our work and the tasks ahead of us. As a team, we value our joint success above the success of individuals.

WE OFFER MORE THAN JUST GREAT PERSPECTIVES

With our strong market position in a highly attractive growth industry, we are able to guarantee promising perspectives for our customers and investors.

In aerospace, safety always comes first, and this principle holds true for investments as well. Through the Fortune 500 Group AVIC we have access to a huge growth market. Responsibly expanding our global market position and leading the way in developing new solutions is essential for our corporate strategy. Our mission as a company is to ensure high performance, safety and long-term sustainability for our customers and investors.

FUTURE

THROUGH EXPERIENCE

Since the company was founded in the 1980s, we have been working with fiber composite future material. Initially in other industries, we continue the road to the success in the air. We have become one of the global leaders in the field of lightweight aerospace components. While much may have changed since our humble beginnings, our pioneering spirit lives on. With our passion and expertise, we are shaping the mobility of the future using the materials of tomorrow.

LOOK FORWARD TO IT.
